```java
final class CrashReportPersister extends CrashReportPersisterTemplate {

    private static final int NONE = 0, SLASH = 1, UNICODE = 2, CONTINUE
 = 3, KEY_DONE = 4, IGNORE = 5;
    private static final String LINE_SEPARATOR = "\n";

    CrashReportPersister(Context context) {
        super(context); //upgrading for super class
    }
    @override
    public void store(CrashReportData crashData, String fileName)
  throws IOException {
        // Unmodified
    }
    @override
    protected synchronized CrashReportData load(Reader reader) throws
  IOException {
        // Unmodified
    }
    private boolean isEbcdic(BufferedInputStream in) throws IOException
  {
        // Unmodified
    }
    private void dumpString(StringBuilder buffer, String string,
  boolean key) {
        // Unmodified
    }
}
```
